Product Files:

This is an example of how you can attach documents to items in your inventory. PDF files are suggested and there are many free way to convert your documents into PDF. However, if you prefer, you can attach Word, Excel, or other formats as well.

You can attach manuals, how-to documents, pricing guides, product specs, or what ever file you would like.

Also, FLV (flash video) files will automatically be set up to download or play as video right on your website.
